

ETL-500

Electric Tool Lift

Designed to eliminate the backbreaking labor of loading and unloading your crew's tools, the new Vanair ETL-500 electric tool lift handles up to three pneumatic tools with no problem. With our electric tool lift your tools are securely transported to the jobsite, where they are safely lifted from the truck to ground level. The ETL-500 eliminates the hassle of a hydraulic system by being powered by the vehicle's battery. Because our actuator has a compact design it is easily incorporated into the frame of the lift, providing more room in the bed of your vehicle.

ETL-500 Features

- Integrated tool holders
- Integrated protective equipment safety shut off
- Various hex tool posts ranging from 7/8" to 1 -1/4"

SPECIFICATIONS

POWER SUPPLY	
Linear Actuator	12VDC ball screw with 30 amp maximum current draw
Maximum Stroke Speed	2.7 inches per second
Temperature Range	-40° to 140° F
Operating Voltage Range	10 to 16VDC (ratings at 12VDC normal) Built-in thermal overload control

DIMENSIONS	
Height	48"
Width	17.5"
Depth Folded	16.5"
Maximum Reach	35.25"
Maximum Drop	30"
Drop Edge	17.37"

Weight	225 lbs.
Lifting Capacity	500 lbs.

Product improvement is a continuing goal. Design and specifications are subject to change without notice or obligations.
